

# StemEnhance™

The first Stem Cell Enhancer

*Supports the natural release of stem cells from the bone marrow*

## Product Overview

### What are Stem Cells?

Stem cells are the raw material from which all other cells can be made. They have the amazing ability to transform into any type of cell in the body. Heart cells, brain cells, blood cells can all be generated from this powerful building block. As we get older, the ability to regenerate new stem cells begins to slow down. As the supply of fresh stem cells diminishes, so does our body's ability to maintain optimal health.

### What is the solution?

Stem Tech Health Sciences, Inc. and scientist, Christian Drapeau have developed, studied and patented the very first adult stem cell enhancer to carry a U.S. Patent and it is the first of its kind on the market. The product, StemEnhance™ is a breakthrough, natural botanical extract that supports wellness by helping your body maintain healthy stem cell physiology. It is the very first product on the market from the latest phytochemical product category called "Stem Cell Enhancers". Studies show that StemEnhance™ supports adult stem cell release by 25% to 30%. The implications for your health and wellness are profound.

### How does it work?

When you take two capsules, the ingredients help to support the release of stem cells from the bone marrow into the bloodstream. Through a natural process, those stem cells then travel to areas of the body where they are most needed.

### Where do I get it?

StemEnhance is only available through StemTech Health Sciences, Inc. and its independent distributors.

StemEnhance™ is a breakthrough, natural botanical extract that supports wellness by helping your body maintain healthy stem cell physiology.

# Description:

AC: ST1205R06AT

StemEnhance is a blend of two compounds extracted from the cyanophyta *Aphanizomenon flos-aquae* (AFA). These compounds are extracted using a proprietary process that utilizes no chemicals or harsh agents. One extract, which contains an L-selectin ligand, supports the release of stem cells (CD34+ cells) from the bone marrow. The other extract, a polysaccharide-rich fraction named Migratose™, may support the migration of stem cells out of the blood into tissues.

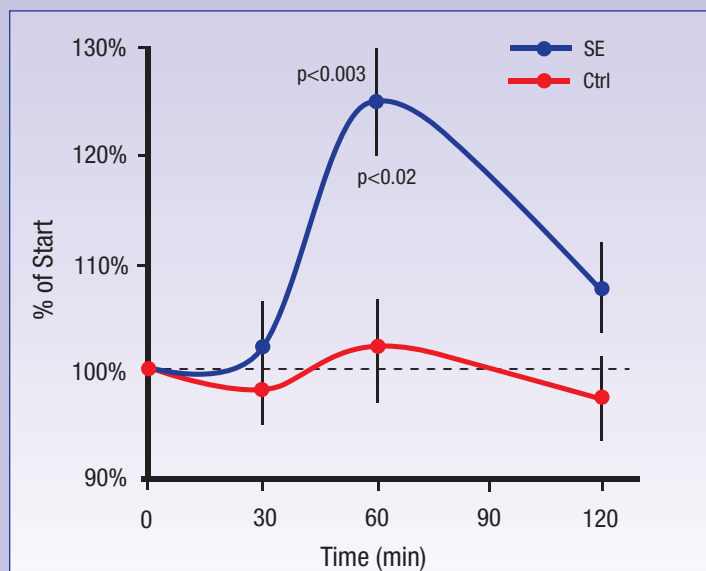

## Use:

One gram of StemEnhance™ triggers an average 25-30% increase in the number of circulating stem cells. The effect lasts for a few hours. The recommended dosage is 2 capsules once or twice daily, at least 6 hours apart.

## Clinical Study:

Effectiveness of StemEnhance was demonstrated in a triple-blind study. Volunteers rested for one hour before establishing baseline levels. After the first blood samples, volunteers were given StemEnhance™ or a placebo. Thereafter, blood samples were taken at 30, 60 and 120 minutes after taking the consumables. The number of circulating stem cells was quantified by analyzing the blood samples using Fluorescence-Activated Cell Sorting (FACS). Consumption of StemEnhance™ triggered a significant 25-30% increase in the number of circulating stem cells.

## Clinical Study Results:

## US Patent:

StemEnhance was the first new product in the phytoceutical product category of Stem Cell Enhancers to receive a US Patent. The patent was issued on November 9, 2004 to Christian Drapeau and Dr. Gitte Jensen. Full details can be found by visiting the US Patent Office Website located at [www.uspto.gov](http://www.uspto.gov) and searching for patent number: 6,814,961

## Disclaimer

StemEnhance is not intended to treat, mitigate or cure any disease, illness or medical condition whatsoever. Always consult a licensed professional health care provider if you have a condition and need treatment.

StemEnhance is a natural wellness product designed to help the body be at its best. It is not intended to take the place of any medical treatment or pharmaceutical drug prescribed by a medical practitioner. Consult your physician if you have questions.

## Supplement Facts

	Amount Per Serving	% Daily Value
Protein	.51g	>2%
Vitamin A	427 IU	9%
Cyanophyta Extract	1g	**

\* Percent Daily Values are based on a 2,000 calorie diet.

\*\* Daily Value not established.
